MOHAMED SAJITH

Agentic AI Engineer | Production LLM Applications | RAG & Agent Workflows | Python & SQL

sajithabdulraheem998@gmail.com | linkedin.com/in/mohamedsajith | github.com/SajithRM | mohamedsajtith.netlify.app

Sri Lanka, relocating to Abu Dhabi, UAE | Available to start within 4 weeks

PROFESSIONAL SUMMARY

AI Engineer with 3+ years of experience building and deploying production LLM applications, including Agentic RAG systems with autonomous tool-calling, natural language to SQL assistants, and enterprise knowledge retrieval over 10,000+ documents. Strong in Python, SQL and FastAPI, with hands-on experience connecting AI agents to PostgreSQL and MySQL databases, vector stores and REST APIs. Experienced in secure on-premise deployments with Docker and CI/CD, and in working with Data Engineers, Business Analysts and stakeholders to turn business requirements into reliable AI solutions. Relocating to Abu Dhabi and available to start within 4 weeks.

TECHNICAL SKILLS

Agentic AI & LLMs: AI Agents, Agentic RAG, Tool Calling, LangChain Agents, OpenAI API, Hugging Face, LlamaIndex, Prompt Engineering

RAG & Vector Databases: Retrieval Augmented Generation (RAG), ChromaDB, FAISS, Pinecone, Embeddings, Semantic Search, Hybrid Search

Languages: Python (Advanced), SQL (Advanced), JavaScript, Node.js, Bash

Databases: PostgreSQL, MySQL, MongoDB, Natural Language to SQL (SQLDatabaseChain)

Backend & APIs: FastAPI, REST APIs, Webhooks, LLM Inference Services, Express.js

DevOps & Deployment: Docker, On-Premise Deployment, CI/CD Pipelines, Git, GitHub, AWS (SageMaker), Azure ML, GCP Vertex AI

Workflow Automation: Webhook Integration, REST API Orchestration, n8n, Zapier

ML & Deep Learning: TensorFlow, Keras, PyTorch, Scikit-learn, Computer Vision, Transfer Learning

PROFESSIONAL EXPERIENCE

Freelance AI Engineer

Self-Employed, Remote | Jan 2025 - Present

- Building Agentic RAG systems that autonomously retrieve, reason over, and respond from large document corpora and structured databases.
- Integrating OpenAI and Hugging Face LLMs with vector databases (ChromaDB, FAISS) and PostgreSQL backends through Python scripts and FastAPI services.
- Developing data pipelines that connect APIs, databases and web content into unified, webhook-triggered AI workflows.
- Deploying AI solutions on-premise with Docker containers, giving clients secure and reproducible environments inside their own infrastructure.
- Communicating technical architecture and progress clearly to non-technical business stakeholders across the full project lifecycle.

AI Engineer

Digital House, Colombo, Sri Lanka | Jan 2023 - Dec 2024

Sri Lankan technology company delivering AI-powered enterprise software for retail, logistics and business analytics.

- Designed Agentic RAG pipelines with LangChain and autonomous tool-calling, enabling AI agents to query databases, retrieve documents and generate accurate responses.
- Built AI workflows integrating LLMs, vector databases and relational databases (MySQL, PostgreSQL) to power enterprise knowledge retrieval over 10,000+ documents.
- Improved knowledge retrieval accuracy by ~40% by implementing hybrid semantic + keyword search pipelines over ChromaDB vector stores.
- Developed natural language to SQL automation with LangChain SQLDatabaseChain on MySQL and PostgreSQL, letting non-technical users query live business data conversationally.
- Built scalable REST API services with FastAPI and webhooks for real-time AI pipeline triggers, connecting AI backends to web dashboards and third-party business tools.
- Containerized all AI services with Docker for on-premise deployments and implemented CI/CD pipelines to automate testing and deployment.

- Collaborated with Data Engineers, Business Analysts and frontend teams to translate business requirements into production AI solutions.

Web Developer Intern (MERN Stack)
TechBridge Solutions, Colombo, Sri Lanka | Jun 2022 - Jun 2023
- Developed full-stack web applications with MongoDB, Express.js, React.js and Node.js, building REST APIs and connecting frontends to backend services.
- Implemented webhook-driven event handling, RESTful API integrations and JWT-based authentication; took part in Agile sprints and code reviews.

KEY PROJECTS

Agentic RAG System - AI Knowledge Assistant
Python, LangChain Agents, OpenAI API, ChromaDB, FastAPI | Live demo:
mohamed-sajtith.netlify.app/project/ai-knowledge-assistant
- Built an Agentic RAG system where an LLM agent decides on its own whether to retrieve from a vector database, query a SQL database, or use web search, based on the user's intent.
- Implemented LangChain tool-calling agents with ChromaDB retrieval and SQLDatabaseChain tools, processing 500+ pages of knowledge content with sub-2s response latency.
- Designed a FastAPI backend with webhook support for real-time pipeline triggers and REST endpoints for frontend and workflow-tool integration.

Natural Language to SQL - Admin AI Chatbot
Python, LangChain, OpenAI API, PostgreSQL, MySQL, ChromaDB, FastAPI, Docker
- Built a natural language to SQL system with LangChain SQLDatabaseChain over MySQL and PostgreSQL, enabling 5+ admin users to query live inventory and sales data conversationally.
- Stored example queries in ChromaDB for few-shot retrieval to improve SQL generation accuracy.
- Containerized and deployed on-premise with Docker and a CI/CD pipeline, exposed as a REST API for dashboards and external tools.

Role-Based Access RAG Chatbot - FinSolve Case Study (In Progress)
Python, ChromaDB
- Building a RAG chatbot that limits answers by user role (Finance, HR, Engineering, Marketing, C-Level, Employee), a pattern needed for sensitive business data.
- Completed document ingestion with department and allowed-role tagging, plus a chunking pipeline; now implementing embeddings and role-filtered retrieval in ChromaDB.

AI Eye Gaze Tracking System
Python, TensorFlow, Keras, VGG16, FastAPI
- Trained a VGG16 CNN with transfer learning to classify gaze direction across 8 classes, reaching 92%+ validation accuracy, and deployed it as a real-time FastAPI inference API.

EDUCATION

BSc (Hons) in Software Engineering, SLIIT (Sri Lanka Institute of Information Technology), Colombo | 2020 - 2024

CERTIFICATIONS & ONLINE LEARNING

- DeepLearning.AI - LangChain for LLM Application Development (Coursera)
- DeepLearning.AI - Building Systems with the ChatGPT API (Coursera)
- Hugging Face - NLP with Transformers (Self-study)
- Google Cloud - Introduction to Generative AI (Google Cloud Skills Boost)
